- (b) O valor dos materiais não originários mencionados na alínea (a) desta Regra deverá, no entanto, ser incluído no valor dos materiais não originários para qualquer requisito QVC aplicável para o bem.

Regra 7: Operações não qualificadas

Não obstante as disposições do presente Anexo, um bem não será considerado como originário do território de uma Parte se as seguintes operações forem realizadas exclusivamente, ou em combinação, no território dessa mesma Parte:

- (a) o bem é transportado directamente da Parte exportadora à Parte importadora; ou

³ "simples" geralmente descreve uma actividade que não requer habilidades especiais, máquinas, aparelhos ou equipamentos especialmente produzidos ou instalados para realizar a actividade.

⁴ "Mistura Simples" geralmente descreve uma actividade que não requer habilidades especiais, máquinas, aparelhos ou equipamentos especialmente produzidos ou instalados para realizar a actividade. No entanto, a mistura simples não inclui reacção química. Reacção química significa um processo (incluindo um processo bioquímico) que resulta em uma molécula com uma nova estrutura dividindo as ligações intramoleculares e formando novas ligações intramoleculares, ou alterando o arranjo espacial dos átomos em uma molécula.

- (b) o bem tenha transitado por um ou mais lados que não sejam as partes, desde que:

 - (ii) o bem não tenha entrado no comércio de um lado que não seja parte; e
 - (iii) a entrada de trânsito é justificada por razões geográficas ou por considerações relacionadas exclusivamente com os requisitos de transporte.

Regra 9:
Exposição

- 1. Os bens originários, enviados da Parte exportadora para exposição no território da outra Parte e vendidos durante ou após a exposição, receberão um tratamento tarifário preferencial, desde que se mostre, à satisfação da autoridade aduaneira da Parte importadora, que:
 - (a) um exportador expediu os bens originários da parte exportadora para a outra parte em que a exposição é realizada e aí expôs essas mercadorias;
 - (b) o exportador vendeu os bens originários ou os transferiu para um consignatário na Parte importadora; e
 - (c) os bens originários foram expedidos durante ou logo depois da exposição para a Parte importadora no estado em que tais bens foram enviados para a exposição.
- 2. Para efeitos de aplicação do número 1, deverá ser apresentado o certificado de origem à autoridade aduaneira da Parte importadora. O nome e o endereço da exposição deverão ser indicados no certificado. Quando necessário, poderão ser exigidas provas documentais adicionais das condições nas quais foram feitas as exposições.
- 3. o número 1 aplicar-se-á a qualquer exposição comercial, agrícola ou artesanal, feiras ou eventos similares que não sejam organizados para efeitos particulares em lojas ou estabelecimentos comerciais com vistas à venda de bens estrangeiros e onde os bens permaneçam sob controlo das alfândegas durante a exposição.

Regra 10:
Tratamento dos Materiais e Recipientes de Embalagem

- 1. Os materiais e recipientes de embalagem para o transporte e envio de um bem não devem ser tomados em consideração na determinação da origem de qualquer bem.

2. Os materiais e recipientes de embalagem nos quais um bem é embalado para venda a retalho, quando classificados juntamente com esse bem, não devem ser levados em consideração para determinar se todos os materiais não originários utilizados na produção do bem atenderam à alteração aplicável em requisitos de classificação tarifária para o bem.
3. Se um bem estiver sujeito a um requisito QVC, o valor dos materiais e recipientes de embalagem nos quais o bem é embalado para venda a retalho devem ser considerados como materiais originários ou não originários, conforme o caso, no cálculo do QVC do bem.
4. Para efeitos do número 1, "materiais e recipientes de embalagem para transporte e embarque de um bem" significa bens usados para proteger um bem durante o seu transporte e embarque, diferentemente daqueles recipientes ou materiais nos quais um bem é embalado ou apresentado para a sua venda a retalho.
5. Para efeitos do número 2 e número 3, "materiais e recipientes de embalagem para venda a retalho" são os materiais ou recipientes em que um bem é embalado ou apresentado para a sua venda a retalho.

Regra 11:

Acessórios, Peças de Sobressalentes, Ferramentas, e Materiais de Instrucionais ou outros Materiais de Informação

1. Para efeitos de determinação da origem de um bem, acessórios, peças sobressalentes, ferramentas e materiais de instrução ou outros materiais de informação apresentados com o bem, devem ser considerados como parte desse bem e, não devem ser considerados ao se determinar se todos os materiais não-originários usados na produção do bem originário sofreram a alteração aplicável da classificação tarifária, desde que:
 - (a) os acessórios, peças sobressalentes, ferramentas e materiais de instrução ou outros materiais de informação apresentados junto com o bem não são facturados separadamente no bem originário; e
 - (b) as quantidades e o valor dos acessórios, peças sobressalentes, ferramentas e materiais instrucionais e outros materiais de informação apresentados junto com o bem são habituais para esse mesmo bem.
2. Não obstante o parágrafo 1, se o bem estiver sujeito a um requisito QVC, o valor dos acessórios, peças sobressalentes, ferramentas e materiais instrucionais ou outros materiais de informação apresentados junto com o bem, devem ser considerados como materiais originários ou não originários conforme o caso, no cálculo do QVC do bem.
3. Os parágrafos 1 e 2 não se aplicam quando os acessórios, peças sobressalentes, ferramentas e materiais de instrucionais ou outros materiais informativos apresentados junto com o bem, tenham sido

adicionados unicamente com o propósito de elevar artificialmente o QVC desse bem, desde que esteja comprovado posteriormente pela Parte importadora de que eles não são vendidos junto.

Regra 12:
Materiais Indirectos

1. Os materiais indirectos devem ser tratados como materiais originários, independentemente do seu local de produção.
2. Para efeitos desta Regra, o termo "materiais indirectos" significa bens usados na produção, teste, ou inspecção do outro bem mas não fisicamente incorporado do tal bem, ou bens usados na manutenção de edifícios ou operação de equipamentos associados à produção de outro bem, incluindo:
 - (ii) Combustível e energia;
 - (iii) ferramentas, matrizes e moldes;
 - (iviii) peças sobressalentes e materiais usados na manutenção de equipamentos e edifícios;
 - (iv) lubrificantes, graxas, materiais compostos e outros materiais usados na produção ou usados para operar equipamentos e edifícios;
 - (iv) luvas, óculos, calçados, roupas, equipamentos e suprimentos de segurança;
 - (v) equipamentos, dispositivos e suprimentos usados para testes ou inspecção do bem;
 - (vi) catalizadores e solventes; e
 - (viii) quaisquer outros bens que não sejam incorporados no bem, mas cuja utilização na produção do bem possa ser razoavelmente demonstrada como parte dessa produção.

Regra 13:
Materiais Idênticos e Intercambiáveis

1. A determinação de se os materiais idênticos e intercambiáveis são materiais originários deve ser feita por segregação física de cada um dos materiais ou pelo uso de princípios contabilísticos geralmente aceitos para o controlo de stock aplicável, ou práticas de gestão de inventário, na Parte exportadora.
2. O método de gestão de inventário usado no parágrafo 1 para materiais idênticos e intercambiáveis deve continuar a ser usado para aquele material durante todo o ano fiscal.
3. Para efeitos desta Regra, "materiais idênticos e intercambiáveis" significa materiais que são substituíveis por serem do mesmo tipo e qualidade comercial, possuindo as mesmas características técnicas e físicas, e que uma vez incorporados ao produto acabado não podem

distinguir-se um do outro para efeitos de origem em virtude de qualquer marca ou mero exame visual.

Regra 14:
Reivindicação de Tratamento Tarifário Preferencial

Uma reivindicação de que um bem será aceito como elegível para tratamento tarifário preferencial deve ser apoiada por um certificado de origem (Formulário IM), conforme estabelecido no Apêndice 1 do Anexo A, emitido pela autoridade competente da Parte exportadora, de acordo com os Procedimentos de Certificação Operacional.

Regra 15:
Revisão e Modificação

2. Em casos excepcionais em que não tenha sido emitido um certificado de origem antes ou no momento de exportação, ou logo depois devido a erros ou omissões involuntários, ou outras causas válidas, o certificado de origem pode ser emitido retroactivamente, mas não com um período superior a 12 meses pós a data de embarque, onde nesse caso seja necessário indicar "EMITIDO RETROATIVAMENTE" na tabela 13 do Formulário IM.

A descoberta de pequenas discrepâncias entre as declarações contidas no certificado de origem e as constantes dos documentos apresentados às autoridades aduaneiras da Parte importadora para o cumprimento das formalidades de importação dos bens, ipso-facto não pode invalidar o certificado de origem, se de facto coincidir com os bens apresentados.
2. Para múltiplos itens declarados sob o mesmo certificado de origem, um problema encontrado com um dos itens listados não afectará ou atrasará a concessão do tratamento tarifário preferencial e o desembarque aduaneiro dos demais itens listados naquele certificado de origem. O parágrafo 3 do Artigo 16 pode ser aplicado aos itens problemáticos.

² "International law" in sub-paragraph (f) of Rule 3 refers to generally accepted international law such as the United Nations Convention on the Law of the Sea.

Rule 4: Not Wholly Obtained or Produced Goods

1. For the purposes of Rule 2(b), a good shall be deemed to be originating if the good has a qualifying value content (hereinafter referred to as the "QVC") is not less than 40% of the FOB value.
2. (a) Notwithstanding paragraph 1, goods listed in Attachment B shall qualify as originating goods if the goods satisfy the product specific rules set out therein.
(b) Where a product specific rule provides a choice of rules from a QVC-based rule of origin, a CTC-based rule of origin, a specific manufacturing or processing operation, or a combination of any of these, each Party shall permit the exporter of the goods to decide which rule to use in determining whether the goods qualify as originating goods of the Party.
(c) Where product specific rules specify a certain QVC, it is required that the QVC of a good is calculated using the formula set out in paragraph 4 of this Rule.
(d) Where product specific rules requiring that the materials used have undergone CTC or a specific manufacturing or processing operation, the rules shall apply only to non-originating materials.
3. The application of paragraphs 1 and 2 above shall be deemed fulfilled provided that the substantial transformation process of production is performed within the territory of the exporting Party.

4. For the purpose of this Rule, the formula for calculating QVC is as follows:

(a) Direct Method

$$(QVC = \frac{\text{IM-PTA Material Cost} + \text{Labour Cost} + \text{Overhead Cost} + \text{Other Cost} + \text{Profit}}{\text{FOB Value}} \times 100\%) \geq 40\%$$

or

(b) Indirect Method

$$QVC = \frac{\text{FOB Value} - \text{Value of Non-Originating Materials}}{\text{FOB Value}} \times 100\% \geq 40\%$$

5. For the purpose of calculating the QVC provided in paragraph 4 of this Rule:

- (a) IM-PTA Material Cost is the value of originating materials, parts or produce that are acquired or self-produced by the producer in the production of the good;
- (b) The value of the non-originating materials shall be:

- (d) Overhead Cost is the total overhead expense; and (e) Other Costs are the costs incurred in placing the good in the ship or other means of transport for export including, but not limited to, domestic transport costs, storage and warehousing, port handling, brokerage fees and service charges.

Rule 5: Accumulation

For the purposes of Rule 2, a good which complies with the origin requirements provided therein and which is used in the other Party as a material in the production of another good shall be considered to originate in the Party where working or processing of the finished good has taken place.

Rule 6: *De Minimis*

For the application of the product specific rules set out in Attachment B:

- (a) A good that does not undergo a change in tariff classification shall be considered as originating if the value of all non-originating materials used in its production that do not undergo the required change in tariff classification does not exceed ten percent (10%) of the FOB value of the good and the good meets all other applicable criteria set forth in this Agreement for qualifying as an originating good.
- (b) The value of non-originating materials referred to in paragraph (a) of this Rule shall, however, be included in the value of non-originating materials for any applicable QVC requirement for the good.

Rule 7: Non-Qualifying Operations

Notwithstanding any provisions in this Annex, a good shall not be considered to be originating in the territory of a Party if the following operations are undertaken exclusively by itself or in combination in the territory of that Party:

- (a) preservation of products in good condition for the purposes of transport or storage;

- (b) the good has transited through one or more non-parties, provided that:
 - (i) the good has not undergone subsequent production or any other operation outside the territories of the Parties other than unloading, reloading, storing, or any other operations necessary to preserve them in good condition or to transport them to the importing Party;
 - (ii) the good has not entered the commerce of a non-party; and
 - (iii) the transit entry is justified for geographical reason, or by consideration related exclusively to transport requirements.

1. Originating goods, sent from exporting Party for exhibition to territory of the other Party and sold during or after the exhibition, shall be granted preferential tariff treatment provided that it is shown to the satisfaction of the customs authority of the importing Party that:

Rule 10: Treatment of Packing Materials and Containers

- 1. Packing materials and containers for transportation and shipment of a good shall not be taken into account in determining the origin of any good.
- 2. Packing materials and containers in which a good is packaged for retail sale, when classified together with that good, shall not be taken into account in determining whether all of the non-originating materials used in the production of the good have met the applicable change in tariff classification requirements for the good.
- 3. If a good is subject to a QVC requirement, the value of the packing materials and containers in which the good is packaged for retail sale shall be taken into account as originating or non-originating materials, as the case may be, in calculating the QVC of the good.
- 4. For the purposes of paragraph 1, "packing materials and containers for transportation and shipment of a good" means goods used to protect a good during its transportation and shipment, different from those containers or materials in which a good is packaged or presented for its retail sale.

- (a) the accessories, spare parts, tools and instructional or other information materials presented with the good are not invoiced separately from the originating good; and
 - (b) the quantities and value of the accessories, spare parts, tools and instructional or other information materials presented with the good are customary for that good.
2. Notwithstanding Paragraph 1, if the good is subject to a QVC requirement, the value of the accessories, spare parts, tools and instructional or other information materials presented with the good shall be taken into account as originating or non-originating materials, as the case may be, in calculating the QVC of the good.
3. Paragraph 1 and 2 do not apply where accessories, spare parts, tools and instructional or other information materials presented with the good have been added solely for the purpose of artificially raising the QVC of that good, provided it is proven subsequently by the importing Party that they are not sold therewith.

Rule 12: Indirect Materials

1. Indirect materials shall be treated as originating materials regardless of where they are produced.
2. For the purposes of this Rule, the term "indirect materials" means goods used in the production, testing, or inspection of another good but not physically incorporated into the good, or goods used in the maintenance of buildings or the operation of equipment associated with the production of another good, including:

stock control applicable, or inventory management practice, in the exporting Party.

2. The inventory management method used under paragraph 1 for particular identical and interchangeable materials shall continue to be used for that material throughout the fiscal year.

3. For the purposes of this Rule, "identical and interchangeable materials" means materials that are fungible as a result of being of the same kind and commercial quality, possessing the same technical and physical characteristics, and which once they are incorporated into the finished product cannot be distinguished from one another for origin purposes by virtue of any markings or mere visual examination.

Rule 14: Claim for Preferential Tariff Treatment

A claim that a good shall be accepted as eligible for preferential tariff treatment shall be supported by a certificate of origin (Form IM) as set out in Appendix 1 of Attachment A issued by the competent authority of the exporting Party in accordance with the Operational Certification Procedures.
